

THE RIGHT TIRE FOR WINTER DRIVING

— KNOW THE DIFFERENCE. DRIVE WITH CONFIDENCE. —

ALL-SEASON TIRES

Designed for year-round use in mild to moderate conditions.

Great for warm weather and light winter conditions.

Balanced performance in dry, wet, and light snow.

Not designed for severe snow or extreme cold.

ALL-WEATHER TIRES

Built to handle a wider range of conditions, including snow.

Better grip in winter conditions than all-season.

Performs well in rain, light snow, and mild ice.

Always 3PMSF certified for severe snow service.

Great choice if you want one tire year-round.

DEDICATED WINTER TIRES

Engineered specifically for cold weather, snow, and ice.

Maximum grip on snow, ice, and slush.

Stay flexible in extreme cold for better traction.

Always 3PMSF certified for severe snow service.

Best choice for safety in harsh winter conditions.

AT A GLANCE

FEATURE	ALL-SEASON	ALL-WEATHER	DEDICATED WINTER
DRY PERFORMANCE	● ● ● ● ● ●	● ● ● ● ● ○	● ● ● ● ● ○
WET PERFORMANCE	● ● ● ● ● ○	● ● ● ● ● ○	● ● ● ● ● ○
SNOW PERFORMANCE	● ● ● ○ ○ ○	● ● ● ● ● ○	● ● ● ● ● ●
ICE PERFORMANCE	● ○ ○ ○ ○ ○	● ● ● ● ● ○	● ● ● ● ● ●
COLD WEATHER FLEXIBILITY	● ● ● ● ○ ○	● ● ● ● ● ○	● ● ● ● ● ●
BEST USE	Year-round in mild climates	Year-round in areas with moderate winters	Winter driving in cold, snowy, or icy climates

PRO TIP

The best winter tire is the one that's right for your driving conditions. When temperatures consistently drop below 45°F, switching to dedicated winter tires is the safest choice.

BETTER TIRES.
BETTER DRIVE.
BETTER PEACE OF MIND.
